

**Supplementary Figure 3.** The 600K complex assembles linear polyubiquitin chains with Ubch5C. (A) 3-8x Ub generated by the 600K complex with Ubch5C, as depicted in Figure 5A, lane 4, were subjected to MALDI-TOF/MS, as described in the legend of Figure 5B. (M1) and (a)-(g) represent the same fragments described in Figures 5B, 5D and 5E.
