Supplemental Figure 6: Bacterial burdens from murine model shigellosis.

a) CFU counts in feces collected daily until day 3 post oral infection of BALB/c mice with WT, \( \Delta ospG \), \( \Delta ospG+ospG^{\text{wt}} \), \( \Delta ospG+ospG^{\text{mut}} \) \textit{Shigella flexneri} (1x10^8 CFU oral gavage), n=11 per group, p>0.05

b) CFU counts in feces collected daily till day 20 post oral infection of BALB/c mice with WT and \( \Delta ospG \) \textit{Shigella flexneri} (1x10^8 CFU oral infection), n=5-14 per group, p>0.05.
