Schwenk et al., Supplementary Figure S1
Supplementary Figure S1: Rescue of lysosomal clustering with siRNA TMEM106B

HeLa cells cotransfected with either control siRNA or siRNA against TMEM106B and either empty vector control or an siRNA resistant HA-TMEM106B (HA-hT106b*) expressing construct. Immunostaining with antibodies against HA (red) and LAMP2 (green). Scale bar represents 50 µm.
