Figure S6. Gene Set Enrichment Analysis in shGFP vs shTaz cells A. qPCR analysis of Taz levels after knockdown of Taz in CK1750, SC241, and Tmet cells used for microarray analysis. B. Enrichment plots from GSEA showing enrichment in shGFP vs shTaz cells. NES = Normalized Enrichment score, P value = nominal P value. See manuscript text for references. C. qPCR analysis of Ltbp4 levels after knockdown of Taz in SC241 cells. D. qPCR analysis of Cyr61 levels after knockdown of Taz in SC241 cells. E. qPCR analysis of Bcl2 levels after knockdown of Taz in SC241 cells.
