**Figure S13**

A. 

- Comparison of hDUSP5 expression in different cell types.
- hDUSP5 is expressed in CD8 T cells, CD4 T cells, B cells, monocytes, eosinophils, and NK cells.
- Significant differences are observed in some cell types.

B. 

- hDUSP5 expression in unstimulated and IL-33-stimulated conditions.
- IL-33 stimulation leads to a significant increase in hDUSP5 expression.
